

The Book

The studio became my next
chapter in life

Author: Goodtrysound

www.goodtrysound.com

It probably started with being at all these different festivals that were in the area around Luleå municipality. There, artists and bands could be discovered from the radio or from the CD player. Where a lot of radio listening has been done over all the years in working life. That was the start of staying as an audience for music.

Where close contact could be made by meeting the artists, big and small, on stage. Not all artists had become stars. But the path there for the artists usually looked good. Development lay ahead of time. Where most artists could get opportunities, including record contracts, as long as the artists or bands kept up.

We could also stand there, on a beautiful day. Not just at home in the room with the amplifier on low volume and no solos were allowed. First, it was parent-free at home, the volume could not be increased so much so the neighbors were disturbed even out in the countryside. We have to respect each other in all places on the globe.

There is so much music to listen to.

All different music styles available on streaming platforms.

Artist after artist and band after band produce so much music that is of such good quality. It is just unfortunate that not all the different places have been able to be visited or different parts of the country. Where different bands perform on tour concepts.

Record labels must have a lot to do to get all the music out and also get all the gigs to match as well as all the music produced.

It's good music being played, if you don't like that particular song. Take another song. Because there's quality and a lot of work with each song that's going to be released to real life and not just in studio format.

Music that is played out there on the town on a summer evening in Sweden or in bars. Where everyone gets to enjoy music that has been released on streaming platforms as well as radio.

To be in the song that is being played or not. May vary.

Whether the song appeals to you or not, the dance moves can quickly get going.

When the corners of your mouth start to move, it's done, then just sing along or scream into your pillow to your song as you follow the movements.

Morgan felt and still feel no direct connection to the association with songs or any more specific genres. Where the heart beats a little extra for just that particular song or genre.

But what should you listen to when you're at a festival?

If you're unlucky, the festival has several stages.

It's not close to any of the scenes.

Morgan don't mean anything bad at all, but at the same time, schedule your favorite bands at the same time or close to the same time when the bands or artists play on each stage.

It makes people want to have a guaranteed live recording. When it also happens in your hometown or where you are going to see music live. It's bad luck or more damned in a personal way.

You would just like to say, to the organizers. But hey, next time you should schedule more different times. So you can get to both places. Although there are

more fans who are going to see the band too. But just for their own part. Bad luck, eh.

Looking back at the Luleå festival which usually takes place during the summers in the city of Luleå.

Where great artists stand on stage.

Not because the idea was when the own music started to be played or with the recordings. To stand on some big stage or stage at all. It's a long way to go to succeed in reaching all the way to the stage or to a record label.

Mostly the thoughts were like the joy of creating something of my own.

Morgan have created something before.

Renovated house in the old village, where Morgan grew up. The house was in Vitå, although he come from Högsön and it belongs to Luleå Municipality.

It was an old house that needed updating.

The renovation went quite well.

But in the end, he moved back to the place where he grew up.

Where new interest, for music at the highest level of interest, came to fruition.

To no longer actively build on the house in Vitå.

Or not doing as much strength training or athletic training any more.

Was something new, that has spent time within for a longer period of time.

Tried some local gyms

Tried some training facilities.

During he's time as a fitness enthusiast. Before music was taken up.

Morgan went down from about 130 kilo to just under 80 kilo.

Where the size of the shirt could suddenly be a size Large.

Just to mention in a hurry, shirts in size Large became a little too small when shoulder press started to pick up in training.

There, the size Large was exchanged for a larger size.

But the weight loss that happened. Was not easy to manage at all. Difficult periods of time with hard training at the gym or active running and cycling training.

Where the weight remained, despite all attempts to get rid of it.

There, vegetarian food became the key to success. In order to be able to lose weight.

Where less meat was left on the table at each meal.

Instead, root vegetables became a permanent fixture on the plate. Replacing the nutrients found in meat, root vegetables became the vitamins for exercise.

Stronger body when more food was on the plate. Instead of being stingy with food intake despite large portions. With all the active training that burned the food and turned it into muscle.

It also took longer for the weight to start coming off. There was always energy and stamina to exercise.

But when food portions became larger, muscle mass also came with it.

Even more fuel was added to the training schedule when food portions became larger.

Where treadmills, outdoor running or cycling became more time-consuming.

To get rid of all the larger food portions that were consumed now.

Now the running competition on the schedule could be cancelled. Still okay tests, although when it came to running outdoors. With 10 kilometers ahead, the time was pretty good in Luleå Municipality.

With the route that went from Luleå University of Technology through Luleå Municipality and then around back to Luleå University of Technology through the outer area of Luleå.

A month or so later, a new competition took place, starting from Luleå

Municipality, Robertsvik. With 10 kilometers left on the starting position.

The time was just above 46 minutes now. Where the time from the previous one was shortened. It was luck to be faster and get a better time as a result.

It was about three months before the competition from Luleå University that took place around Luleå.

In short, time with training had improved significantly.

It is possible to succeed even outside of life.

Although the training slowed down with the move back to the neighborhood where he grew up.

Where music would become something new in life, a new chapter to move on with when the house couldn't stay or work life didn't seem to matter anymore. Where all the old jobs were behind now and didn't exist in everyday life. Life would take a new turn, with all the other good things that life can contain.

The age had also now passed 30 years.

Where no courtship would be expected after the message may have reached everyone who wanted to court to refrain from celebrating even age or visiting this time.

Where courtship has been forbidden in advance even before.

Now that I think about it,

Can elite sports with training be a late chapter in life?

Where no sports club was behind to support with financial means or training opportunities.

All training should be on your own and personal. In order to reach either elite athletic training or crossfit.

But Morgan didn't manage to get there. He also couldn't get good enough times to apply for bigger elite competitions. Where Morgan could be seen or heard and do well.

Had a few races behind me. In the local area, but didn't always get to the races. Felt pretty good in many races. Although managing the races within 10 kilometers on asphalt was fine. In the forest it was worse with terrain running.

On roller skis, flew ahead with 10 kilometers of freestyle. On the asphalt road at home.

Trained on longer distances with roller skis, went pretty well.

With for training in the summers, with distance running.

Running became part of the new life, where it was impossible to avoid running in the winter following the snowmobile tracks.

Not in this branch of life, fully succeeded in wanting to reach the top.

Also the same thing with the house that was renovated.

I just feel very disappointed when it wasn't successful either.

Just take new steps, as they say.

Although all these defeats. Hope no one calls them in a larger sense. Except that you tried anyway. With something in this life, on your own. Where you feel that you made a mistake in not being able to complete these civil works. Although you have actually had approved reasons for not being able to finish either the house or continue with training on a daily level with sports.

When Morgan was about twelve years old. New computer Morgan could buy. There was no wifi or fiber. No high speed internet at the country side. The year was around 2003 and forward.

There computer gaming could be in the room. There computer was in Morgans life. There action gaming could, be on the computer.

Morgan kept to be outdoor and with friends. Morgan took, the cycle when he was outdoor in the country side.

Soccer or hockey didn't exist in Morgans life. These athlets sports was a closed chapter. The sports have closed, of ecomic reasons. It is expensive to have a activity and exercise. We all should have afford to some activity.

These sports as soccer and hockey never come up on Morgans life again. It was a closed chapter.

There music was closer to being explored now after all the bad result with the property or the athletic exercise.

Than building a house or keeping up with training.

It was as if there was something else to take over in life after training and building a house.

When everything else was over after a few years.

The year was 2025,

When both singing and musical instruments like guitar playing would start to be combined with singing and trying to create something of own with music.

That the old ways of being able to succeed remained. Even with trying something new in life, which previously was building houses and training.

But what would the cultural experience be like?

By trying to play music and upload material on different platforms that should be of good sound quality as well as good music to get people to listen.

As well as starting to upload music on any suitable streaming platform. Which platform should be chosen. Which were there to be chosen as a new musician at a hobby level who wanted to share his music creation with the rest of the world.

Who also does not have or has had a business.

It was www.youtube.com

Who became the choice to upload music there under the Youtube channel name Goodtrysound.

No advertising for companies like Youtube should be mentioned. Where as little advertising as possible should be mentioned as well as other terms in this book.

The name Goodtrysound, which means good sound try.

How that artist name came about, I can't remember or recount how that artist name came about.

Just that it says Goodtrysound as the artist name.

Where the website was also discontinued in the year 2025.

There you can read about various cultural creations as well as other creative things that have happened during Goodtrysound's time.

Like this thing about creating cultural programs.

Sent the idea to Swedish Television.

The production company Sveriges Television could not help this time.

There the idea and thanks for the request from Sveriges Television came back in an email.

Where something of your own could be created instead, but how should you make a program?

Or was it more a case of taking a chance when the opportunity arose to create

something from the idea that came back?

What to do with the production of programs when the economy is not at its peak.

There was a cultural program called: The Culture Program which can be found on the Goodtrysound website.

Where video and audio recording are done with a camera.

There is not always video recording in The Culture Program.

Although there were twelve programs of ideas about culture. Where twelve programs will be broadcast on Goodtrysound's Youtube channel.

See the advertisement for the program or visit the website for more information.

The Culture Program will start broadcasting in January 2026.

Where everything became a reality after a few months of planning, program script writing and editing. There are twelve ready-made program ideas that will be implemented.

The Culture Program will run monthly throughout 2026, with a new part released each month. There is no set date for when each part that will be uploaded.

To become a public figure with music creation and also with everything on the website. As well as under Goodtrysound's Youtube channel.

Artist name Goodtrysound.

Being under the artist name Goodtrysound, is nothing special more than that. In a personal way. It's just continuing to be yourself and nothing else.

Fast to be seen and heard now all over the globe with video and audio recordings from Youtube. Where music and cultural programs are uploaded.

I don't think about any star status. Because it doesn't exist in everyday life. At least no one has told me or said what makes you have that title. That is, star status.

Besides being able to call himself an artist. After having made singles in Swedish and English. Also Demo (Here I Come) in English and Album (Iam Here) in English.

There are more recordings uploaded on the channel where music is uploaded to the platform.

Where sound quality may not have been the best when all the music was created or all the creativity has been lost within cultural contexts.

But now, in 2026, I'm trying to make some remixes of the old music. With better sound recording than before, as well as the lessons behind all the music creation.

All with poorer sound or picture quality due to financial reasons. Which is also called budgeting for the cultural investment that is being made with Goodtrysound.

Goodtrysound has tried to get sponsors or some kind of financial means to advance in cultural creation.

Although it is difficult to prove to companies that they should invest in Goodtrysound.

As a future partner. Where many different people and companies try to make their voices heard and be seen by doing good work within their industry and company.

Is it difficult to get sponsors?

Where many try to focus their activity on sponsorship messages, where financial resources can be added if the right criteria are met.

Where everything that matters now is within reach to create cultural engagements within culture with Goodtrysound as the brand.

Where every opportunity exists to establish yourself in the world. Only the right tools as support can be the key to success or not.

The camera that records both sound and picture remains. As an picture and video recorder.

Where sound has been amplified with sound cards in the year 2026.

Where more professional sound can be recorded. Where more sound quality is to be heard from Goodtrysound creating music, programs and other videos.

Also the decision to close all social media platforms. Felt like a step in the wrong direction. However, the decision became permanent. All social media was closed after a week or so of advance notice on the social media platforms.

Message that could be some kind of press release from a person who has had more and more Goodtrysound in recent days who has taken over the social media platforms to create something permanent and be able to work full-time with the Goodtrysound brand as a non-profit.

The message was released in January 2026 on social media platforms. On various platforms that were available.

The announcement to close down social media platforms was hard to digest but became a reality. Decision to only be available on the website www.goodtrysound.com and on the YouTube channel there is a video recording and audio is uploaded.

Also works with the brand name Goodtrysound.

Can only hope that everyone who followed social media has had time to see the press release and will go to the website instead.

After all, it would start with audio as video recording with Goodtrysound.

Hadn't been in these work circumstances before.

The basics of how recording would work had to be learned.

Even though video recording is not fully edited with cut scenes when the camera is turned on and when the camera is turned off.

The sound can be called a bit of old-time recording quality. Which is found at the beginning of Goodtrysound's video as audio recordings with videos uploaded.

Overall, there have been a few videos with music recordings.

When the compilation was finished.

Mention in one of the demos (Here I Come) or in the Album (Iam Here) that the sound from Goodtrysound can be considered a bit raw like an old sound recording.

Where there are videos about short statements about how the demo as an album came about, there are comments about music recorded in Demo as an Album format.

Where the voice must be strained so as not to be too weak in video recording.

Where musical instruments take over the sound from the voice unless effort is made.

It has been a wonderful time with sound and video recording. With all the creation of creativity.

These days, The Culture Program is on top priority. To finish each part before each month's program upload.

Also news like Classic music Country & Rock 15 minutes was recorded. Where more classical music recordings are in the future schedule in the home studio. When the opportunity arises and when everything is ready, more audio files with classical music will be uploaded from Goodtrysound music creation.

Where it was more of a shock to be able to get 15 minutes of classical music audio file. Which still turned out to be a pretty good composition considering it was the first time recording classical music.

Which can be considered a bit of the difficult thing about music creation. Tones, melodies and chords must be put together over a longer period of time with musical instruments that will play music that is put together by the conductor. The conductor leads the orchestra with the musicians in front of him. Where several musical instruments are put together at the same time.

Sure, creating an audio file with musicians who are artists or with bands. Is also not the easiest thing to do. Where musical instruments are to be combined with singers and shorter melodies are to be put together and become a song or music album.

Where the audience is on a different platform than classical music.

Regular music audiences can be found at music festivals or radio stations, where their songs can be heard being played.

But getting there isn't the easiest thing. Becoming an established artist or band.

It can happen overnight. Even if your career is over in the same amount of time.

Whether or not everything takes hold out there in society. How much support there is out there in society about different things about people that are being told.

Or about different companies that are going to establish themselves in a certain area. To be able to succeed in their industry.

How much support is there among public order officers such as police officers who ensure that every little mischief doesn't end up on the authorities' to-do list.

They are supposed to make sure that we have a safe everyday life, who are the public order guards or public police officers? Aren't we all in that category, where we make sure that we do what is right for us every day and don't end up on the bad side of the long arm of the law.

Becoming an established musician was probably not part of the planning or future career development opportunities.

Where audio files are uploaded to Sveriges Radio's music portal. To get the opportunity to be heard and seen on Sveriges Radio.

What an experience to have your first audio file uploaded to the Swedish Radio music portal.

The first song that was uploaded is a single song from Goodtrysound's music creation. The song is called: I Thoughts which is written and produced in English.

With guitar as a musical instrument and vocals. It is a thoughtful song about love and meeting someone you can't resist. Because you thought you had traveled the world and when you saw this person. You couldn't resist saying these words in the song.

Song quote: After I had traveled around the world, I meet you.

Comment: Thought I wouldn't meet anyone at all, after all the miles around the globe. Found my love somewhere on the globe. With you in my world, everything is complete and okay.

Here is the song I Thoughts, not in song but with words and sentences, the song should be retold in a normal tone and without musical instruments.

First comes the song with the original English version and then with the Swedish translation.

Song is retold exactly as it is in the music creation song that is uploaded. Song repeats twice and then swings around with the chorus as the third repetition as the ending.

Let us present I Thoughts English Version. Single:

I thought I have

Traveled the world

I thought I have seen

Everything

Until I have

Meet you

With you in my world

Everything is complete

With you in my world

Everything is okej

I thought I have

Traveled the world

I thought I have seen

Everything

Until I have

Meet you

With you in my world

Everything is complete

With you in my world

Everything is okej

With you in my world

Everything is complete

With you in my world

Everything is okej

That was the English version with I Thoughts, here is the Swedish translated part. Which has never been read or recorded.

I thought I have

Traveled around the world

I thought I have seen

Everything

Until I have

Meet you

With you in my world

Everything is complete

With you in my world

Everything is okej

I thought I have

Traveled around the world

I thought I have seen

Everything

Until I

Meet you

With you in my world

Everything is complete

With you in my world

Everything is okej

With you in my world

Everything is complete

With you in my world

Everything is okej

This music song. Available recorded in different versions. The best upload is probably what we can announce Radio version. We were very happy when the song I Thoughts was uploaded on Sverige Radio Musikportal. Where the homestudio is what Morgan have and can afford with.

The song became a reality when free program exist on the internet. Morgan do what he can to deliver the best music or creation he can. When music, creation or the culture program is uploaded or produced.

I Thoughts, song is also uploaded on Goodtrysound Youtube channel under playlist Radio Versions and also English playlist.

Any more music creation in 2026 is still unclear whether new material will be produced or if all the old songs will be revived in 2026.

Where cultural programs like remixes and classical music are being planned. In any case, things are moving forward.

Would like to play music that is in Goodtrysound's music catalog. However, at the same time, all music creations are uploaded to Youtube on Goodtrysound's channel.

Where no one misses anything if you check the website regularly.

Where news is written on the website, if there is anything to name.

Personally, not much is happening. Apart from time and energy on music creation and The Culture Program as well as development of the Goodtrysound brand.

The entire cultural program will be completed in December 2026.

To develop now as a musician, under the brand Goodtrysound.

Where there is no company started or found someone who would consider giving away any money. Who is not in need of any banknote at all on a permanent basis. Still haven't found anyone who can contribute to any project or start of anything at all that isn't in the starting blocks. It's only Goodtrysound as a brand that will develop in the future and nothing else have existed.

With Morgan's personal background, no people has been able to help Morgan get benefits or get back on his feet. After years of financial hardship that left their mark after the house was sold and no money has come to Morgan other than his salary from work.

There, Morgan's work with the Goodtrysound brand will be put on hold until everything is back to normal or until someone reaches out to help.

Morgan has made several announcements to various organizations questioning how it actually works. He may be the only person who doesn't seem to understand how it works or how the economy is going to come back in any way.

Back to music and video recording in the home studio. Feels a little too bad for the future not to record video or sound in a good way. To get sponsors or to be seen and heard.

Energy and time should be invested in creating more professional audio and video recordings.

Which should symbolize more professional studio work with all creation that takes place in uploading on the YouTube channel and on the website.

Where all time spent backwards should be seen as learning time as well as development potential and opportunities in the future to create the conditions for everything that is needed.

Hit the right chords and the right tempo with musical instruments. It takes talent and the will to keep going with the right activity.

Not all songs recorded from Goodtrysound have the same music tempo or music composition.

Where rhythms are tried to be put together at the right tempo. Like musical chords for each song. Which will create a song. Which will be able to be recorded and listened to.

Where every song should be as perfect as possible in order to be uploaded and also be listened to by more people out there in the world.

Which is uploaded on www.youtube.com/@goodtrysound which is the website address for the Goodtrysound Youtube channel which you can also access through www.goodtrysound.com which is the own website for Goodtrysound.

In 2026, albums like demos will be refreshed with better sound quality and re-uploaded. With new versions that deserve better sound recording that will become remixes on the same playlist as the demo and album are today.

However, the new songs that will be recorded will be marked remix 2026 and when good sound is available as a good version, song by song will be uploaded under the same playlist as previous albums that demos are uploaded to.

Where old demos and albums remain with the old recordings.

Where new material will be published without video recording. Only audio recording with remixes on demos and albums during the year 2026.

More versions of singles in both Swedish and English will also be remixed and uploaded to the Remix playlist in 2026, as the playlist is already up with new versions.

No, it's not possible for anyone who isn't a little curious or wondering how. Where are all the sponsors to make it possible to invest in your own activity outside of work.

Or whose new sponsors for old activities or new activities can be found to make it possible to pursue an elite career in any industry.

Where there may be time and opportunity with the right conditions to succeed directly with your particular activity.

Where many gigs are needed to survive on music royalties. Not just a few hundred gigs per song as there may be for Goodtrysound if statistics are to be shown as an exposure opportunity on Goodtrysound's Youtube channel.

Future tour gigs also feel incredibly inspiring to perform if all the technical issues can be resolved, including obtaining permits to play music outside in cities and squares. Which is the concept of the Goodtrysound Tour concept of playing outdoors.

This may happen in 2026, where times may be during regular work weeks as well as weekends that may occur in the Tour for Goodtrysound to play music outdoors.

Where not everyone can enjoy the music that is played. However, we will do what we can to ensure that you can enjoy the tour cities played with a video camera.

However, a new camera is required that can record for longer than 25 minutes at a time.

Hope for the best in the future.

Where, if possible, a new video camera and permission to play music will be approved.

Hopefully, video recording will take place for each city that Goodtrysound will play in. We can only hope, that everything will be great in the future and if Morgan could play outdoor and everything will be fine.

Where all videos can be uploaded to Youtube under Goodtrysound's channel.

Where the Tour playlist is already out on the website. Also practice at home with video and audio recording, is uploaded on the channel. With seventeen songs that will be played, as it is now in the tour playlist.

It may be a little different with the tracklist if remixes make a big impression until those gigs can take place and time with the tour concept.

Where time is limited for playing for each occasion outside cities regulated in the permit that the police give the go-ahead to perform or not.

Unless nothing is left unchanged, not all music can be played.

The songs that form the playlist for Goodtrysound's Tour concept are uploaded on Goodtrysound's website, under the Tour category.

New songs that are popular may also appear on the tour playlist. However, the

length of each song may vary.

If more songs are to be included and fit into the playlist with live performances, songs with choruses can be shortened or repetitions can be reduced by the number of times the verses are repeated in the song.

Even after the wishes of others as well as your own wishes. When the song hits just right that day. With the right setting on instruments such as singing voice. When everything flows, as it usually does every day.

There Morgan lives today, there was no running water in the home. There the water question was a late thing to do. When no financial funds was there to meet the request and needs of a water asset on daily time in the home. Where Morgan grew up.

Morgan did have some time of period with the car that was bought in Stockholm in Sweden during the car meet. That has the name, Power Big Meet in Västerås in Sweden, Stockholm.

The Cadillac that Morgan bought was a Cadillac Coupe De Ville, from the year 1968. The car did have rear seat and front seat.

Cruising did happen with that Cadillac. Boden and Haparanda in Sweden the car was driven to.

Then the Cadillac was broken. Parts was ordered from USA.

The Cadillac was still in the garage. Wheels was bought to the Cadillac. It was chrome wheels that was of the size twenty tum and twenty-two tum chrome wheels.

That fit to the Cadillac. That was suppose to show up with the Cadillac when the car was done. It never became a reality. The Cadillac was never restored finished by Morgan.

The Cadillac sound was a little higher than the original.

The Cadillac was sold, when financial asset did miss to the house that was renovated. Everything that existed should turn out to be at the property that never either became a reality. To live in or to have some other people around there in that property in Vitå.

That property that did end up with the Swedish Bailiff.

There today and time backwards have a struggle to get the Swedish Bailiff and other government included to do another search at the computer. That the employes have. There money or assets should became Morgan if Morgan have asset some where else in the world. If people are remind about the request or the question that is. Dont bother if you dont whant money. Morgan wants he's money if he have at some company or government around the world. We dont know so far where. Or have the Court from the Sweden or the Government and Swedish Bailiff that now is responsibility for their act. How the work with money question or handle everything around government question.

Here we will show you a little of the writing to the Swedish Governmt about the question that should be tried. From the Court in Sweden (Act number: FT 196-26)

The complain that was about the Swedish Bailiff work decision about that the Government have done everything they could have done with the task and work with to find some money or assets some where in the world. That the Swedish Bailiff was done with the work and have their doucment's on the right side of the law.

That work is below all circumstances not approved. With all the riht that should follow with the law at the right side, the work that is done from the Swedish Bailiff should be on tried and approved to the people. That money question, should be more work and effords from the Government side to have their daily work approved.

There we see the Swedish Government and Swedish Bailiff as criminals. Swedish Government and Swedish Bailiff is on the table to have comitted wrong on their daily work. That not is approved.

In Swedish lawbook there is on the Criminal law twenty chapter 1§ about the Government and the employees does daily wrong in their work.

The Swedish Bailiff decide to rejection the act and don't do anything about it after the decision. Both about the property that was sold and also about no seek about money question or asset around the world.

That the Swedish Bailiff are doing not everything they could in their daily work. That the issue and request is not answered. The Swedish Bailiff do write in their act that they have seek for some money in some government act or other act that is not approved and is written in the complain to the Swedish Court.

Where is every internationell seek, or collaboration. There the Swedish work from the Government side is not approved at any way.

The Swedish Bailiff is a company that is suppose to do their work with find asset and it's their company description in the daily time work.

There no platform as Encrochatt has been writing in the act or other affords to seek in other platforms. When a propoerty is sold and Swedish Bailiff is doing their work what they think is everything. Don't the Government need to work a little more to find asset or money. There people could be able to live and to have a daily life.

There no seek in Encrochatt or other collaboration has been done from The Swedish Government.

Where the debtor is renounces all kind of engage to be familiar with Government work or Encrochatt. Or even collaboration with internationell countrys. Where the debtor have no clue about how its working. Where no people have told have it should work or how it has been. Around the world, Morgan have still no visiting or money arrived after all whats has happend the last years.

There the debtor should walk free, if money or asset is on some company or

Government, Where the debtor has been doing what the debtor could to be free from issues that seems to come some where in the world. There no people could tell or write in a act where everything is from.

There the debtor don't belong to a prison if money turns out to be found somewhere in the world. Or that the debtor should be unreliable and dont have any confidence in the society. That the debtor don't want to be named or mentioned more than its necessary. That also why, the debtor is below a artist name. That not is mentioned is this subject in close about Swedish Government or Swedish Bailiff.

Is Encrochatt only a platform to combined with internationell subject's as rumours as visiting people in young age and also the money question.

The Court can't reply at some question at all. Even that the lawbook's is up side down. When it comes to law question or tried.

Continue with the book,

There Morgan have asked differnt organisations about how it really works in out daily life or as mentioned above have question about the financial asset and money issue.

There of some reason, that is not clear about the financial replacement. When people have turn the age eighteen years old. Or is this a April of First joke. That later will be announced in media. There everything is clear about what has happend and not has happend. That exist in our daily life.

There it is complain to the Swedish Government without Swedish Governemnt to handle the issues that is on the request.

More about cultural sponsorship and attempts to become self-sufficient.

Where Morgan has tried to get sponsors even through Luleå Municipality. Who could not help Morgan at all through the Social Services department.

There, Morgan will have to wait with support from the Municipality, the Authority or the State.

From Morgan's email, a letter was sent about cultural support about how or when and whether it might be possible for someone with support from the municipality, authority or parliament to contribute.

If Luleå Municipality, the Social Services Department was able to raise its financial resources to help Morgan with his cultural pursuits, which could become something big one day.

There, the municipality refused and was unable to help Morgan.

The letter was written to the Social Services Department of Luleå Municipality. The text read as follows:

Point 1 (one) in getting financial funds for cultural initiatives or being able to stand on your own two feet again.

Hello, Social Services!

This matter should be addressed because it is the wrong decision that has been considered to not grant approval to someone who is in distress or need.

By the municipality as well as by the authorities. Where the Social Services shall, according to Chapter 4, Section 2 of the Social Services Act, give approval to a municipality resident who resides permanently in the municipality according to Chapter 2, Section 1 of the Social Services Act.

Where the municipality as a social service should be able to meet the needs of other people if those needs are not met according to Chapter 4, Section 1 of the Social Services Act. Should Chapter 4, Section 2 of the Social Services Act be used to meet the needs that exist for people who are outside.

Now it is like this that Morgan is without a job opportunity. Morgan is looking for work, according to your requirements from the Social Services.

Morgan is also not entitled to unemployment benefits or any other form of financial compensation.

(With the exception of spelling or word errors, when someone else's broken electronic equipment is temporarily loaned at the time of writing.)

Now that Morgan is applying for financial assistance from you, it is because Morgan has absolutely no money at all or anything that can be sold.

Morgan has no vehicles, cars, motorcycles, boats or snowmobiles. Morgan also has no shares or properties. Contact Social Services for attachments regarding property, bank statements and the tax return.

Now that Morgan is applying for financial assistance from you, you are considered Morgan's employer. Because Morgan has no other work or source of income. Morgan is homeless and without assets.

You are making demands on Morgan so that Morgan can receive assistance, and you are also considered Morgan's employer where Morgan now works for you at the Social Services according to your rules and laws.

As long as Morgan does not have any other employment and meets your requirements from the Social Administration and the Social Services Act. This fulfills the Social Services' requirement for compensation of 4500 Swedish kronor per month to Morgan until Morgan can stand on his own two feet again.

Where Morgan is available with music, creations or The Culture Program at www.youtube.com/@goodtrysound or www.goodtrysound.com

Where Morgan can be found in over 100 videos on Youtube, under the artist name: Goodtrysound where there is also a website for all creations with music as a program and other creations on www.goodtrysound.com

When Morgan now applies for electronic equipment that also includes musical instruments, we believe that Morgan should have a good chance of creating his own self-sufficiency by offering his services such as entertaining other people on the streets and squares.

By playing music, through the contribution you could now give to Morgan through support or donations, Morgan can start playing in the streets and squares. Morgan can't do that today, because Morgan completely missing electronic equipment that also functions as a musical instrument.

This is proof that people like Morgan can achieve self-sufficiency by offering Morgan a small financial compensation as a last chance and opportunity. Where Morgan can get back on his feet, where Morgan can offer his services through the computer and post music.

As well as to write on the computer and be part of a network of social contacts that gives everyone in society a broader network of contacts or the opportunity to create their own life without the Municipality, Authority or Government involved.

There are few people who see people other than seeing people who apply or are in society as just a number on a piece of paper in their office. That is why this request is unique in its own way. Where no one else can help Morgan but you who are in the municipal or state powers.

Where Morgan tries time and time again to be self-sufficient. Where the municipality and authorities pull Morgan's legs out of the way every time Morgan tries. It is the municipality and authorities that are supposed to help Morgan be on his own two feet and self-sufficient when people need help.

Not taking away all the chances for Morgan that could have existed!

Even though many employers nowadays require job seekers to be active, well-mannered, and have a network of social contacts, this should be included as part of the CV and in the curriculum vitae.

It doesn't work if a person is homeless, where Morgan's property was forcibly sold a few years ago. Where Morgan didn't get a single penny from that property. Where approximately 750,000 Swedish kronor has been spent on the house and no travel costs or personal time work on that property.

That property was sold for approximately 150,000 Swedish kronor by the Swedish Bailiff.

I have heard from government officials and read that there are people who claim that a mobile phone should be able to replace a computer or other type of electronic equipment. But then we place demands on those of you in the service sector who sit behind computers. If you now believe that Morgan should do without electronic equipment or instruments.

Could you civil servants just as easily own a telephone instead of a computer, since it would otherwise be considered a waste of tax money by us citizens?

We strongly disagree, as we absolutely do not believe that a telephone is considered sufficient for writing or as an support as a electronic equipment.

There it should be a personal computer as electronic equipment. Because we also believe that no one should have to carry out their personal business on public computers. If you think so, you as civil servants can just as well sit in a library with your business. Even comparing a phone does not have the same storage space as a computer. If you have afford with expensive phone or electronic equipment.

Phone does not have the same capacity as a computer. A phone will need to be emptied quite often, on documents such as video clips. Or other types of documentation. In case, you reject electronic equipment or musical instruments. Is it the last hope for humanity because there are no other ways to support yourself.

If Morgan does not get a job opportunity, Morgan will still be without assets. However, in order for Morgan to get a job, Morgan must have good hygiene, be neat and have a network of contacts. Morgan does not have that, unless you give Morgan financial compensation for the withdrawal of electronic equipment such as musical instruments.

Where Morgan can increase his chances of getting work as well as to be able to start his own business. As well as because during the time Morgan is unemployed, Morgan can increase his chances of getting his own finances by playing music on the streets and squares. As well as to offer his services in the digital world as well as for freelance jobs.

If the need for financial compensation can't be met in any other way than for the Social Services to provide financial compensation, the Social Services Act states that it is the Social Services in each municipality that must provide security for people in their everyday lives.

The social services have not made an inquiry about Morgan's knowledge or motivation to try to make himself support himself. We therefore believe that Morgan should have the right to receive financial compensation from you at the Social Administration. Morgan can make attempts to earn his own living by offering services by owning a computer, by acquiring a network by owning a personal computer.

Also by getting gigs when Morgan has singles, demos and albums uploaded on www.youtube.com/@goodtrysound

The social services have not asked what instruments the client uses. The social services have not asked what type of electronic instrument the client uses.

The Social Services have also not asked whether the client uses a subscription or not. When it comes to subscriptions such as surfing or being on the internet, there is no other way than for Morgan to obtain his own subscription when the Social Services provide Morgan with financial compensation.

We do not believe that Morgan should cycle or walk to his bus station as we have written below, and then get on a bus for an hour one way. And then be at the library that shares its network with others. We do not believe that the public networks are of a good enough standard or for permanent use, therefore, personal matters should not need to be carried out there on the municipality or the authorities' public network or computer.

We believe that personal networks (internet) should be available in every public housing facility. If you use a Halebop brand prepaid card, there is no mobile data (internet) on the prepaid card. We do not believe that the Social Services or the court can reject this letter because the Social Services have not made the request or because the client is unclear in his letter.

We do not believe that the Social Services or the court can refuse to use (2017:725. 13 Chapter §7–9). Where the computer cannot be directly compared to a telephone. As the Social Services believe that it should be enough to be able to write or to travel to a library every day to be able to use a computer. See, map and distances). Isn't it the Municipality where people live that should help citizens not to avoid all different economic conditions.

We believe that the Social Administration should investigate why the Social Administration does not believe that personal networks (internet) should be acquired. Because public networks should not be used for personal business. According to the Public Administration Act's investigative responsibility, section 23§. Also that the Social Administration should investigate the comparison between a computer and a telephone. Telephone, which we do not consider to be sufficient to be used as an electronic support.

Because previously, the Social Services have considered that a telephone should be able to replace a computer. Which we strongly question, if the comparison

that the Social Services have made between a computer and a telephone. That a telephone should be considered sufficient, no we say. It is a computer that is the standard according to today's reasonable living conditions.

Also that we believe that Social Services is the last and safest place where people should be able to apply for compensation when people are in need. Social Services should correspond to the last protective net in a society, when people are in need and in need of help, Social Services should correspond to the expectations that exist according to SOL 4 Chapter 1§.

Since ancient times, the Social Services have been given greater responsibility to meet existing expectations. From older socks to today's Social Services, the Social Services must meet existing expectations when it comes to people in need and help.

As per the Local Government Act, there are requirements for staff to follow, such as the Social Services Act. Even through we are increasingly dependent on Social Services, even when it comes to self-sufficiency, demands are placed on people who are in need and need help.

Through forms and statements from accounts where you can receive contributions from today's local municipal Social Services. But to be on the steps that lead to the door of the Social Services Office. It's not very fun to be in constant need and not be able to stand on your own two feet.

Even in today's present, Social is of the unconscious most important pieces of the puzzle that exists in every municipality. In the old days, the parishes (1057 municipalities in 1952) were merged into today's municipalities (approximately 290 municipalities).

Social services shall secure people's everyday lives, according to SOL (2001:453 1 Chapter 1§) where society shall strive to achieve equality in people's living conditions. Social services shall, according to 1 Chapter, 1§ 2001:453. Promote and release people's and develop people's own resources as per the Convention on the Rights of the Child, Article 6. That everyone should

have the right to opportunities to develop people's own abilities and capacities.

According to the Local Government Act (2007:725. 2 Chapter 3§.) The people of the municipality should be treated equally and unless there is reason for something else. There are no other reasons, other than to process this request to satisfy Morgan's need to be able to stand on his own two feet through music and culture.

Where Morgan can become self-sufficient again. R.1990:119, If acquired with approval from the Social Services.

R.1995:63, If there were reasonable costs for withdrawal from the Social Services.

R.1997:47, On financing projects, in this case the project is about financing a project such as a university.

What we can consider to be project related and could be compared to the funds in the municipality as well as a university being financed where people are there to use the financing. What we really mean when we say that the municipality have financed or sponsored the school.

If a municipality contributes financially to a school, the municipality could just as easily contribute to the people in the local municipality with financial compensation. Where we believe that citizens who are in need of financial compensation should be ahead of the line-up, rather than schools that can be financed by someone else.

Morgan can't be financed by anyone else, Morgan has search sponsors although no people wants to give any money. Because Morgan missing electronic equipment or internet. Therefore, Morgan can't carry out his regular errands or even try to earn money through music royalties or gigs that Morgan can't perform when musical instruments or speakers are missing.

Even as mentioned before, a municipality is the last place where citizens of a municipality should be able to seek protection, security and even financial compensation if the citizen meets those requirements. We believe that we can be compared to financing a resident of a municipality, comparable to how a university with residents (students) can be financed.

If, by comparison, financing a member of the municipality with a computer for approximately 3500.- Swedish kronor, we do not believe there is any reason to avoid financing the member who is in need and in need in the municipality. R. 1997:47.

It is approximately 8.4 kilometers single way to the bus stop, to be able to take Morgan to the public transport that goes towards Luleå municipality.

In Luleå, a computer is also required to be available, which must be booked at the libraries before use.

Which we can't think is reasonable. That someone should have to carry out their personal business on public computers or on public networks (the internet).

Not to forget the financial part where in winter it is necessary to book a ride to the public transport stop, or Social Departments believe that people should walk a few kilometers single way to the bus stop and then take the bus into Luleå where a computer that we do not consider to be normal requirements meet for use for personal use.

Believes that no people should have to use public computers for personal data use.

Distance approximately 8.4 kilometers one way: From the Home address. To Nearest stop there public transport is available.

See information from the bus line's website. See information from Maps, directions, aerial photos, nautical charts & much more on the internet where maps are available.

Morgan shouldn't have to take the public transport every time Morgan needs to have time at a computer. Or have to cycle or walk to the public transport every time Morgan needs to travel or run an errand.

Why shouldn't Morgan's needs be met so that Morgan can have a chance to stand on his own two feet where no other else but Morgan can, so that Morgan can become self-sufficient again. By trying to find his own way back into working life.

Who else is going to help Morgan, if not Luleå Municipality through the Social Services Department?

Ask yourself, how is it really going out there in the world in different places?

Point 2 (two) in getting financial funds for cultural initiatives or being able to stand on your own two feet again.

The response from Luleå Municipality was a rejection of the grant or scholarship. The appeal was written and the text is below (point three),

Point 3 (three) in getting financial funds for cultural initiatives or being able to stand on your own two feet again.

Appeal Cultural Grants. Change of rejection of cultural grants or scholarships must be made due to the following reasons,

If a change can be made, Luleå Municipality shall send an application for a

change in its decision to reject the application to the Administrative Court. See the attached document, i.e. this appendix that is being read.

The highest ambition of the Social Services is that those who meet the requirements for financial assistance. Will receive payment of the Social Services' financial assistance of 4500:- Swedish kronor per month. Also that the highest ambition of the Social Services is that those who apply will be able to manage their everyday lives again with the help of the Social Services.

Where no people should have to live on the financial assistance that comes from the Municipality. With the support of the Social Services Act 2001:453. 4 Chapter 1§, anyone who applies for support from the law will be granted financial assistance from the Social Services.

Where the applicant should do everything the person can. To become a breadwinner again. Where in this case for example. The person spent all the free time learning to play the guitar like singing.

Where the result is on the website www.goodtrysound.com where the person is trying to create something that can support themselves. Until then, you at the Municipality should help that person. Otherwise, the person will be stuck in your lap and on your desk every month. Where people like Morgan move on in life without help from the Municipality.

What do you think about Municipalities within (SKR, which is an abbreviation for) which are the Municipalities and Regions of Sweden?

Where now someone is trying to create their own livelihood, by playing music. But the assistance that you can pay out from the Municipality. Is not

enough to be able to invest that much.

A scholarship is needed where you at the Municipality have every opportunity to create contact as a long-term poster. By expressing yourself according to agreement, the artist comes from Luleå Municipality. We are the people who have sponsored this artist.

Through 4 Chapter 2 § Social Services Act. Where the artist have the whole world as their audience and event. Where you at the Municipality should be sharp in this matter.

By opening up for scholarships there. How else do you think, the people should become self-sufficient just by looking for a job opportunity at the Employment Service.

It is not possible to invest more, in the person perhaps future cultural company that is on the website above. Without your help, do you not see at the Municipality that there is no other solution. Other than that you have to contribute more your help, read the application again.

You at the Municipality are the last resort who can help the Municipality's residents. When residents are in need of help.

The responsibility of municipalities has become more and more. More than before. Where authorities such as State assistance no longer exist.

Where you at Municipalities have financed projects that are in the

application. With Municipal tax funds.

Where you, the municipalities, cannot even provide assistance for down payments for musical instruments or other accessories.

It is not included in your national norm or in the municipality's granting of support financially or with labor. Come on now, now you have all the options as an alternative to step up as pioneers. Talk to your municipal neighbors about what is wrong or right.

Maybe now the Municipality can make a small effort for a cultural scholarship from the Social Services Act 4 Chapter 2 §. Where people can become breadwinners through you at Luleå Municipality.

Even the property that has been renovated. Everything that was there before, is not there today. How did it happen?

The answers are that more people have been in need of help and many have turned a blind eye to problems.

You at the Kommun can stand at the podium at Kommun House and discuss the future. Whether it should really be like this or not in the future.

What more can you ask from someone who has become homeless and doesn't have a penny left in the bank before the person applied to you at the Municipality for financial assistance from Social Services.

At the end of the day, all people end up on your table at the Municipality. Where all responsibility rests with you. Where you have people on paper as just a number in the crowd. How you will act, only you can decide, right?

Who else should help vulnerable people, if not the Municipality, which should be the last resort to turn to if people need help?

Email your suggestions or comments if you come up with anything.

On the Gmail email address: coltranepolkan@gmail.com

Where scholarships can be just a few clicks or calls away. Where people can live a fairly normal everyday life after all.

When everything falls into place again, after all the years of being idlers. Where 4 Chapter 2§ Section of the Social Services Act, could provide space for people to be able to stand on their own two feet and be self-sufficient.

Point 4 (four) in getting financial funds for cultural initiatives or being able to stand on your own two feet again.

Then the answer from Luleå Municipality was that Luleå Municipality can't sponsor people with financial means without a company or association. The answer came on January 22, 2026. That the municipality cannot contribute at all.

The reply became a question to Luleå Municipality about how the point of view that Luleå Municipality responded with could be changed or interpreted in other

ways, where, just as in the text, we have read about how difficult it is for homeless people to become self-sufficient again or even get back on their feet.

Now you have been able to share personal stories such as involvement in culture, working with the Goodtrysound brand and different parts of someone's life.

Where a lot can happen in the world. Just by having the will and trying your best.

Where different interests can fade away if the opportunity is not there.

Where activity can be adapted after effort. Which no one can control. Like age or finances.

Where new opportunities arise through new interests or old ones that are brought back to life again.

Have a good time everyone.

Hope you are doing well too.

This concludes this book about Morgan's personal events and work with the Goodtrysound brand. All attempts to get help as other events are also mentioned in this book.

Like even personal stories, we can forget. After all the misery that has happened.

Where we can only look forward, with the Goodtrysound brand and music as culture creation.

Don't forget to check out Goodtrysound's website. www.goodtrysound.com

Thank you for reading this book. Thank you to all the fans and followers around the world.

We hope you will stay as an audience throughout the journey with Goodtrysound's brand establishment as all creation with Goodtrysound.

Vocabulary comprehension, in this book:

Genres: Different styles of music in different senses. For example, pop, rock, opera, rap, country and hip hop

Streaming: Various platforms where music is uploaded from artists, bands, companies or record labels. Where audiences can listen to different artists as musicians.

Association: This means that you compare or connect different categories with each other. Like big artists should make good money just because they're on stage and are full-time professionals. It doesn't always have to be that connection. Or that someone is in town and watching. Doesn't always have to mean that the wallet is empty when someone comes back.

Phys: Hard training load. Which often involves tests before training. Where physio is a kind of control of where the training people are.

We have mentioned in this book, the law from Sweden. There you find every law in the Swedish Law book.

Where, SOL is mentioned and that is a short explain of Social Services Act. There employes and local government citizens are finding whats in their terms of help. If help is needed, in differnt errands.

Act Investigate Responsibility, is there the government and local people are find the rules about errand.

Local Government law, is there the local citizens and employes find decision from the local government.

When R and number is mention there is old law decisions that has been made earlier.

With reservation for spelling sentences or words that do not belong there or are in the correct place in the text.

There are no collaborations in this book.

All places and organizations that have been mentioned are related to the content of the book and the author has taken precautions with investigation before naming, when naming has taken place in the literature. Where all places and names that are mentioned are public places or public where no harm should have been taken by naming in this book.

All patent rights regarding books also as Goodtrysounds' creations must be observed with patent rights that do not allow remixing or other mixing of Goodtrysounds' material.

Facts: Morgan works non-profit with Goodtrysound as a brand. Just as it is named in the book, everything should be normal again to be able to start a business. Where normal is considered to be a job or money in the bank. Where

not homeless or forced to live at the Social Services department at Luleå Municipality for livelihood support with financial assistance applications every month.
